FOREIGN DIRECT INVESTMENT IN CANADA SINCE THE SECOND WORLD WAR

AMENDMENT NUMBER 3

This amendment updates the main tables in Annex A of the working paper, Foreign Direct Investment In Canada Since The Second World War. It incorporates revisions and new information published by Statistics Canada between 19 November 1970 and 12 January 1973.

The working paper was first issued in January 1970. Amendment Number 1, which was issued soon afterwards, contained a few technical corrections which have been incorporated in copies of the main text printed since then. Amendment Number 2, which updated a number of the main tables, was issued in November 1970. The current amendment incorporates or revises the material included in Amendment Number 2, and thus supersedes it.

Amendment Number 3 updates all of the tables in Annex A. The amended portion of each table replaces the material in the original working paper for the years stated. If any item in a line of figures for one year has been changed, the whole line is included in the amendment.

The material in this document should be used only in conjunction with the original tables, since the original footnotes may affect interpretation of the figures.

The main sources of the new material are the following publications of Statistics Canada;

Canada's International Investment Position 1926 to 1967.

The Canadian Balance of International Payments 1965-70.

Quarterly Estimates of the Canadian Balance of International Payments, First Quarter 1972.

Quarterly Estimates of the Canadian Balance of International Payments, Second Quarter 1972.

Quarterly Estimates of the Canadian Balance of International Payments, Third Quarter 1972.

Data for the tables which cover the book value of long-term investment, of direct investment, and of total investment controlled by non-residents were taken from Canada's International Investment Position 1926 to 1967 and from Quarterly Estimates of the Canadian Balance of International Payments, First Quarter 1972. The series which cover long-term investment and direct investment have been updated to 1968. Those which cover total investment controlled by non-residents have been updated to 1968, with a breakdown by industry group to 1967.

Data for the tables on earnings, on payments of interest and dividends, and on payments of dividends were taken from several sources. The most recent are from The Canadian Balance of International Payments 1965-70. This updated to 1967 the series on total direct investment earnings, to 1970 the series on combined interest and dividends, and to 1966 the series on dividends by industry group and by country or area of control.

The series on annual net capital inflow for direct investment, by country or area of control, were updated to 1971 in the quarterly estimates. A further breakdown by industrial group of the inflow from controlling interests in the United States was updated to 1967 in The Canadian Balance of International Payments 1965-70.
